DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 6 are, drawn to a doubly doped lithium niobate crystal, classified in class 423, subclass 594.15.
 - II. Claim 5, drawn to a process for growing a doubly doped lithium niobate crystals, classified in class 252, subclass 584.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the lithium niobate crystal of Group I may be produced by another materially different process that does not require putting the lithium niobate powder into a Pt crucible and using the Czochralski pulling method.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and different search, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Stephen G. Adrian on 6/27/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1754

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonas N Strickland whose telephone number is 703-306-5692. The examiner can normally be reached on M-TH. 7:30-5:00, off 1st Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on 703-308-3837. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.
